CHAIRMAN U.S. CIVIL SERVICE COMMISSION

TRANSMITTING

THE FORTY-SECOND ANNUAL REPORT OF THE BOARD OF ACTUARIES OF THE CIVIL SERVICE RETIREMENT SYSTEM FOR THE FISCAL YEAR ENDED JUNE 30, 1962, PURSUANT TO SECTION 16 OF THE CIVIL SERVICE RETIREMENT ACT

July 16, 1963.—Referred to the Committee on Post Office and Civil Service and ordered to be printed

U.S. GOVERNMENT PRINTING OFFICE
WASHINGTON: 1963

21-161

LETTER OF TRANSMITTAL

U.S. CIVIL SERVICE COMMISSION, Washington, D.C., July 15, 1963.

Hon. John W. McCormack, Speaker of the House of Representatives, Washington, D.C.

Dear Mr. Speaker: The Commission is pleased to send you herewith the 42d Annual Report of the Board of Actuaries of the Civil Service Retirement System for the fiscal year ended June 30, 1962, submitted in pursuance of section 16 of the Civil Service Retirement Act.

The report has also been sent to the President of the Senate. Sincerely yours,

JOHN W. MACY, Jr., Chairman.

LETTER OF SUBMITTAL

NEW YORK, N.Y., May 31, 1963.

U.S. CIVIL SERVICE COMMISSION Washington, D.C.

Dear Commissioners: The Board of Actuaries appointed under section 16(g) of the Civil Service Retirement Act has the honor to submit herewith its 42d annual report on the operation of the fund. The report gives a statement of the Government appropriation necessary to finance the fund on the normal cost-plus-interest basis, under the benefit and contribution provisions of the act as amended to June 30, 1962, and on the basis of the estimated membership of the fund as of thet data the fund as of that date.

Respectfully submitted.

GEORGE B. BUCK. DORRANCE C. BRONSON,
R. R. REAGH,
Board of Actuaries, Civil Service Retirement System.

42D ANNUAL REPORT OF THE BOARD OF ACTUARIES OF THE CIVIL SERVICE RETIREMENT SYSTEM

The civil service retirement and disability fund was established in 1920 to furnish retirement benefits to officers and employees of the U.S. Government who become superannuated in governmental service or incapacitated before attaining old age. The Retirement Act makes provision for a Board of Actuaries of the Civil Service Retirement System and in section 16(g) defines the chief duties of the Board, as follows:

* * * to report annually upon the actuarial status of the system and to furnish its advice and opinion on matters referred to it by the Commission, and it shall have the authority to recommend to the Commission and to the Congress such changes as in the Board's judgment may be deemed necessary to protect the public interest and maintain the system upon a sound financial basis. The Commission shall keep or cause to be kept such records as it deems necessary for making periodic actuarial valuations of the Civil Service Retirement System, and the Board shall make such valuations at intervals of five years or oftener if the Board shall make such valuations at intervals of five years, or oftener if deemed necessary by the Commission. * * *

This report, which has been prepared as of June 30, 1962, is the 42d annual report of the Board of Actuaries. The report gives first a summary of the main benefit and contribution provisions of the act as amended to June 30, 1962. This summary is followed by an estimate of the present membership and a table showing the number and amount of annuities in force on June 30, 1962. The report next gives a discussion of the appropriation payable by the Government for the support of the fund. Statements giving the results of a valuation of the liabilities on account of annuities in force as of June 20. ation of the liabilities on account of annuities in force as of June 30, 1962, and the results of the mortality experience of annuitants for the past year are then submitted. In conclusion, the Board makes certain comments on the present operation of the fund.

SUMMARY OF BENEFIT AND CONTRIBUTION PROVISIONS OF THE CIVIL SERVICE RETIREMENT ACT

Public Law 87-793, approved October 11, 1962, provides for higher salaries and adjustments in annuities. The cost of this law is not included in this valuation nor are the improved benefits incorporated in the summary below. However, a discussion of the law is included

with the Board's conclusions on page 9.

The following summary states the main benefit and contribution provisions of the Retirement Act currently in effect as they were interpreted by the Board of Actuaries. "Average salary" is used to denote the average annual basic salary received by the employee during any 5 consecutive years of creditable service which affords the highest average. "Lump-sum credit" means the unrefunded amount consisting of the retirement deductions made from the employee's basic salary; any sums deposited by the employee covering prior service; and interest on such deductions and deposits, at 4 percent per annum to December 31, 1947, and at 3 percent per annum thereafter, compounded annually to December 31, 1956, or, in the case of

an employee who separates before he has 5 years of service, to the date of separation. The lump-sum credit does not include interest if the service covered thereby aggregates 1 year or less.

BENEFITS

Service retirement

Condition for eligibility. -- Retirement is compulsory at age 70 after

15 years of service, with certain exceptions.

Retirement is permissible at the option of the employee at age 60 after 30 years of service or at age 62 and 5 years of service. A Member of Congress may retire at age 60 after 10 years of Member service.

At the option of the employee at age 55 after 30 years of service, or upon involuntary separation not due to misconduct or delinquency after 25 years of service, or after age 50 and 20 years of service, or upon separation from service of a Member of Congress other than by resignation or expulsion after age 50 and after having served in nine Congresses, an immediate annuity is payable equal to the regular annuity reduced by one-twelfth of 1 percent for each full month not in excess of 60, and one-sixth of 1 percent for each full month in excess of 60 the employee is under age 60.

Amount of benefit.2—The annuity is equal to—

(1) The larger of—

(a) 1½ percent of the employee's average salary multiplied by so much of his total service as does not exceed 5 years; or

(b) 1 percent of the employee's average salary, plus \$25, multiplied by so much of his total service as does not exceed

5 years; plus (2) The larger of—

(a) 1% percent of the employee's average salary multiplied by so much of his total service as exceeds 5 years but

does not exceed 10 years; or
(b) 1 percent of the employee's average salary, plus \$25, multiplied by so much of his total service as exceeds 5 years but does not exceed 10 years; plus

The larger of-

(a) 2 percent of the employee's average salary multiplied by so much of his total service as exceeds 10 years; or

(b) 1 percent of the employee's average salary, plus \$25, multiplied by so much of his total service as exceeds 10

No annuity is to exceed 80 percent of the employee's average salary exclusive of that provided by voluntary con-

Ortain employees who have rendered 20 years of service in the investigation, apprehension, or detention of persons suspected or convicted of offenses against the criminal laws of the United States are eligible to retire after age 50 and receive an annuity of 2 percent of average salary multiplied by the number of years

retire after age 50 and receive an annutry of 2 percent of average satary indiapare by the nature of years of scrice.

An additional annutry of \$36 for each year of certain specified service in Alaska or on the Isthmus of Paparams is allowed officers and employees who are citizens of the United States. The annutry of a congressional employee or former congressional employee is computed as above except that for each year of military service and service as a congressional employee, not in excess of 15 years, and for each year of Member between the annutry is equal to 2½ percent of average salary provided be has at least 5 years of service as a congressional employee or Member or any combination of such service. The annuity of a Member of [Congress or of a former Member with title to a Member annuity is computed as above except that if he has had at least 5 years of service as a Member or a congressional employee or any combination of such service, the annuity for each year of Member service and creditable military service and for each year of congressional service not in excess of 15 years, is equal to 2½ percent of average salary: the maximum annuity is 80 percent of final salary exclusive of that provided by voluntary contributions.

Disability retirement

Conditions for eligibility.—Retirement is permissible upon disability after 5 years of civilian service.

Amount of benefit.—The benefit is determined by the same method as used for service retirement. The minimum annuity is 40 percent of the employee's average salary but never greater than the annuity he would be entitled to were his service to include the period elapsing heatstake the data of severation and the data he attains are 60. The between the date of separation and the date he attains age 60. The provision for a minimum benefit does not increase the annuity payable to any survivor

An individual generally may not receive retirement annuity and compensation for injury or disability to himself from the U.S. employees' compensation fund for the same period, but if eligible for both benefits must choose one or the other. However, he may concurrently receive annuity and scheduled disability payments or medical services.

Deferred retirement

Condition for eligibility.—Upon separation from service after 5 or more years of civilian service, a deferred annuity is payable at age 62. A Member separated with 10 years of Member service may receive a deferred annuity beginning at age 60, or, with 20 years of service (including 10 years Member service) may receive a deferred annuity beginning at age 50, reduced as described under "service retirement."

Amount of benefit.—The deferred annuity is computed by the same method as the regular annuity.

An employee may elect to receive his lump-sum credit in lieu of the deferred annuity, provided separation occurs and application is filed at least 31 days before the annuity commencing date.

Lump-sum benefits

Upon separation from active service before completion of 5 years of

civilian service, the employee's lump-sum credit is paid to him.

Upon death before 5 years of civilian service or after 5 years of civilian service where there is no survivor entitled to an annuity, the employee's lump-sum credit is paid to his beneficiary.

Upon death of a retired employee before the payments of the annuity equal the lump-sum credit the difference is paid, unless there is a survivor entitled to an annuity. Upon termination of all survivor annuities before total annuity payments equal the lump-sum credit, the difference is paid.

Annuities to dependents upon death in active service

Condition for eligibility.—Annuities to dependents are paid upon death of an employee in active service after 5 years of civilian service.

Amount of benefit.—(a) If survived by a widow or dependent widower, an annuity beginning after the death of the employee equal to executar annuity beginning after the death of the employee equal to execute the regular annuity is payable until death or remarriage of widows or widower or until the widower becomes capable of self-

(b) If survived by a widow or widower each surviving child who received more than one-half his support from the employee shall be paid an annuity equal to the smallest of (1) 40 percent of the employee's average salary divided by the number of children, (2) \$600,

or (3) \$1,800 divided by the number of children.

21-161-63---2 Mixery of

CIVIL SERVICE RETIREMENT SYSTEM, 1962

(c) If survived by a child or children and there is no widow or widower, each surviving child shall be paid an annuity, equal to the smallest of (1) 50 percent of the employee's average salary divided by the number of children, (2) \$720, or (3) \$2,160 divided by the number of children.

Upon death of the widow or widower, the annuity payable under

(b) to a child or children is recomputed and paid as provided in (c).

The annuity payable to a child is terminated upon attainment of age 18, marriage, or death, whichever is earlier, except if such child is incapable of self-support by reason of mental or physical disability incurred before age 18 his annuity is terminated only upon death, marriage, or recovery from such disability.

Upon termination of the annuity of a child, the annuities to other children are recomputed as though the child whose annuity was

terminated had not survived the employee.

Optional benefits

At retirement a married employee may elect to receive in lieu of his or her regular annuity a reduced annuity payable during the employee's life and an annuity payable to the surviving widow or widower equal to 50 percent of as much of his regular annuity before reduction as he designated. The annuity to the survivor commences after the retired employee dies and ceases upon death or remarriage. The reduction in the employee's annuity exclusive of any portion of the annuity payable on account of the minimum provisions in cases of disability retirement is 21/2 percent of so much of the regular annuity as he designated as does not exceed \$2,400, plus 10 percent of any excess over \$2,400.

At service or deferred retirement any unmarried employee in good health may elect to receive in lieu of his regular annuity a reduced annuity payable during his life and an annuity payable after his death to a survivor annuitant equal to 50 percent of such reduced annuity. The annuity payable to the employee is reduced by 10 percent of his regular annuity and by an additional 5 percent of the regular annuity for each full 5 years the person designated is younger than the retiring employee but such total reduction shall not exceed 40 percent.

Annuities to dependents upon death after retirement

Upon the death of an annuitant, benefits calculated in the same mariner and payable under the same conditions as those granted upon the death of employees in active service are payable to surviving children.

CONTRIBUTIONS

 $By \mid employees$

Regular.—Employees other than Members of Congress pay 6½ percent of salary commencing October 1, 1956. Members of Congress pay 7½ percent of salary for Member service commencing October 1, 1956.

Toluntary.—Any employee who does not owe a deposit for prior service may contribute additional sums in multiples of \$25, but the total amount may not exceed 10 percent of the employee's basic salary for service rendered since August 1, 1920. Voluntary contributions earn 3-percent interest, compounded annually. Any regular contributions made by an employee after he has performed sufficient service to entitle him to the maximum annuity are first

Approved For Release 2001/03/02: CLArR PRTS, 03721A00040010009-6

applied to any deposit due, and the balance is deemed to be voluntary contributions. Additional annuity may be purchased at retirement by the voluntary contribution account, or it may be refunded at any time prior to receipt of any additional annuity.

By Government

Beginning July 1957, each employing agency must contribute amounts equal to the deductions of its employees.

While no direct appropriations are required by law, estimates of amounts needed to finance the fund on a "normal cost-plus-interest basis" are to be submitted.

ESTIMATED ACTIVE MEMBERSHIP AS OF JUNE 30, 1962

The active membership of the fund as of June 30, 1962, was estimated by the Civil Service Commission to consist of 2,250,000 employees with an annual payroll of \$13,096,300,000.

Annuitants on the Roll as of June 30, 1962

The following table summarizes the number and amount of annuities The following table summarizes the number and amount of annulties in force on June 30, 1962, as shown by the records of annultants maintained by the Civil Service Commission. On pages 10 to 16 of this report, the distributions of the number and annuities of annultants on the roll as of June 30, 1962, by age, are given.

METHOD OF FINANCING PLAN A WEST CONTROL STATE

Each employee contributes 6½ percent of his compensation and each employing agency matches the contributions of its employees, The act does not specifically provide for direct appropriations by the Government but does state that "the Commission shall submit estimates of the appropriations necessary to finance the fund on a normal cost-plus-interest basis and to continue this Act in full force and effect." Under this provision, the estimated appropriation submitted by the Commission should consist of the part of the normal contribution not met by employees' contributions and those of employing

agencies, and interest on the deficiency.

The normal contribution rate is the average percentage of the salaries of new employees that is required to be paid into the fund from the time they enter service until they leave service in order to accumulate sufficient funds to pay their benefits. Contributions at the normal contribution rate alone will not support the fund for present employees because there is an accrued liability in the fund for which no appropriations have been made, and which is referred to as the "deficiency." This deficiency arose originally when the fund was established and employees were given credit for their prior service during which no contributions had been made by the Government. This deficiency has grown during the years the fund has operated for various reasons including liberalization of benefits and inadequate contributions. If the deficiency is not to increase in the future the full normal contribution should be met and interest on the deficiency paid. Any amount needed to meet these requirements over and above the contributions provided by members and the matching contributions of the employing agencies will need to be met by Government appropriations if the fund is to be financed on the "normal cost-plus-interest basis.'

Annual Appropriation of Government as of June 30, 1962

The following statement as of June 30, 1962, gives an estimate of the amount payable by the Government on the basis of the estimated payroll as of that date should it make an annual appropriation equal to the normal cost not met by the contributions of employees and employing agencies plus the interest on the deficiency.

TABLE II.—Total annual contributions required to support the civil service retirement system on the normal cost-plus-interest method prepared as of June 30, 1962

	Norr	nal cost as—	Defici	ency cost as—	Total cost as-		
Contribution	Per- cent of payroll	Annual amount	Per- cent of payroll	Annual amount	Per- cent of payroll.	Annual amount	
Total	13.83	\$1,811,21 .000	7.71	\$1,009,801.000	21.54	\$2, 821, 019, 000	
• •	6.50	851, 259, 000			6.50	851, 259, 000	
Payable by employeesPayable by Government: employing agenciesAdditional		851, 259, 000 108, 700, 000	0.71	1, 009, 801, 000	6.50 8.54	851, 259, 000 1, 118, 501, 000	

The normal cost to support the benefits accruing on account of current service is equivalent to 13.83 percent of payroll, which is the normal cost shown in last year's report. The employees contribute 6.50 percent toward the normal cost and the employing agencies match their employees' contributions. Therefore, there remains 0.83 percent to be appropriated by the Government to meet the normal cost. On the basis of the estimated payroll as of June 30, 1962, this represents an annual payment of \$108,700,000. In addition to the normal cost, the table shows a deficiency payment of \$1,009,801,000 to meet the accruing interest at 3 percent on the estimated deficiency as of June 30; 1962. Therefore, the total annual appropriation needed in addition to the contributions of employees and employing agencies is \$1,118,501,000, if the fund is to be supported on the "normal cost-

The amount of the annual deficiency payment is greater than that shown in last year's report due to the fact that during the fiscal year 1962 no direct appropriation was made by the Government other than an amount to cover the increases in annuities and new annuities granted under Public Law 85-465 for the year 1962. As a result, the deficiency which as of June 30, 1961, was approximately \$32,547 million has increased to approximately \$33,660 million. The increase consists of the unpaid interest on the deficiency at the beginning of the year, the deficiency in interest income and the part of the accruing normal cost, with interest thereon, that exceeded the contributions by employees and the employing agencies. Since no direct appropriation is being made by the Government for the year 1963, the deficiency next year will again be greater by the amount of the deficit in the normal contribution and the interest on the deficiency. The deficiency will continue to increase until the full normal cost is met and interest on the deficiency is paid.

LIABILITIES OF FUND ON ACCOUNT OF ANNUITANTS ON THE ROLL AS of June 30, 1962

In accordance with its usual practice, the Board of Actuaries is presenting below the results of a valuation of the liabilities of the fund on account of annuitants on the roll. This valuation, prepared as of June 30, 1962, was based on the mortality tables included in the 38th annual report of the Board. A 3-percent interest rate was used.

Table III.—Liabilities on account of annuitants as of June 30, 1962

Group Group		f benefits to annu	itants on the roll
A BUT TOOL OF THE CONTROL OF THE CON	Regular an-	Voluntary an- nuities	Total annuities
Retired on account of age and voluntary and involun- tary separation. Retired on account of disability. Reversionary annuities to designated beneficiaries ¹ . Survivorship annuities ¹ .	\$6,036,535,000	\$20, 220, 000 1, 788, 000	\$6,056,755,000 1,898,046,000 1,265,353,000 1,425,691,000
Total	10, 623, 837, 000	22, 008, 000	10, 645, 845, 00

¹ Includes voluntary annuities.

In the 41st annual report of the Board, the liabilities on account of annuities payable to annuitants on the roll as of June 30, 1961, were shown to be \$9,611,561,000, as compared with \$10,645,845,000 as of June 30, 1962, or an increase in liabilities of more than a billion dollars during the year ended June 30, 1962.

SUMMARY OF MORTALITY EXPERIENCE OF ANNUITANTS FOR THE YEAR ENDED JUNE 30, 1962

For the purpose of making a check of the mortality tables adopted for annuitants, the actual and expected number of deaths during the past year were compared, separately for men and women who had retired on account of age, or voluntary or involuntary separation from service; and for men and women who had retired on account of disability. The following table summarizes the results of the comparison.

Table IV.—Summary of the comparison of the actual and expected deaths among annuitants July 1, 1961, to June 30, 1962

7	Nu	hs	Ratio of actual cases	
Group	Actual	Expected	Difference	to expected cases
Employee annuitants retired on account of age or voluntary or involuntary separation: Men	12, 126 1, 721 5, 552 945	12, 769. 2 1, 824. 1 6, 067. 7 1, 043. 7	+643. 2 +103. 1 +515. 7 +98. 7	0. 950 . 943 . 915 . 905

A check of the tables used for widows was also prepared this year. The following table summarizes the comparison:

Table V.—Summary of the actual and expected terminations among female survivors of deceased employees and annuitants, July 1, 1961, to June 30, 1962

G At a material on	Numl	Ratio of actual cases		
Cause of termination	Actual	Expected	Difference	to expected cases
DeathRemarriage	3,975 1,138	3, 988. 2 985. 3	+13. 2 -152. 7	0, 997 1, 155

The expected terminations shown in the preceding tables were based on the mortality and termination rates shown in the Board's 38th report. The actual rates of mortality continued to be less than the expected rates. However, the actual rates were closer to the expected rates than in the previous year.

Conclusions

During the year ended June 30, 1962, the deficiency increased by more than a billion dollars, from \$32,547 million to \$33,660 million. The increase arose from insufficient contributions and the deficiency in interest earnings.

As of October 11, 1962, Public Law 87-793 was approved. This legislation was not taken into account in determining the deficiency

as of June 30, 1962, but will have a considerable effect on the deficiency as of June 30, 1963.

There are two parts of the act that affect the Civil Service Retirement System. Part II of Public Law 87–793 provides for revised basic compensation schedules for Federal employees. The higher salaries provided by these schedules become effective in October 1962 and January 1964. Since retirement benefits are based on the average annual basic salary received by an employee during any 5 consecutive years of creditable service which affords the highest average, the benefits based on past service will be increased considerably, which will in turn increase the deficiency. The increase in deficiency as of

June 30, 1963, that will arise on account of these salary increases has been estimated to be in excess of \$2 billion.

Part III of Public Law 87-793 provides for an adjustment in annuities to those now on the retirement roll and those who retire up to December 31, 1966, and also provides for future automatic adjustments in annuities for present and future retirees if the Consumer Price Index continues to rise. Part III also increased the benefits to Price Index continues to rise. Part III also increased the benents to be paid to certain survivors of employees who die in service or after retirement and amended the definition of "child" to include a full-time student under age 21. Since the act did not authorize funds for the increase in annuities and the stipulation contained in Public Law 85-844, that no increase or new annuity benefits enacted by amendment to the Civil Service Retirement Act after August 28, 1958, can become effective until there is appropriated an amount sufficient to prevent an immediate increase in the unfunded accrued sufficient to prevent an immediate increase in the unfunded accrued liability, applies, no adjustment in the deficiency or normal cost is being made at this time. It is assumed that the payment of these benefits will be contingent on annual appropriations by the Government. However, such liberalization of benefits where the present benefits are not being adequately financed is throwing a greater and greater burden on future taxpayers.

As this report indicates, the deficiency continues to increase at an alarming rate. The mortality experience of annuitants indicates that more conservative mortality tables are in order and that the adoption

of such would further increase the deficiency.

The Board wishes to restate—and again emphasize—the recommendation given in previous reports for action, namely, that the Government make direct appropriations equal to the amount necessary in addition to the contributions of employees and employing agencies to meet the full permal cost and the amount of according interest on to meet the full normal cost and the amount of accruing interest on the deficiency, or that preferably it adopt a definite revision of the act which will accomplish this purpose.
